**GRADES 4-5**

**Extreme STEAM**

This challenging class is designed for those students who are curious and love to design their own projects. Design and build an air-powered rocket, build a launching system and test it out. Build a Hoop Glider to see how far it can fly. Learn the art of problem-solving and how to improve your designs for improved speed or distance. Join us in Extreme STEAM as we set off to have some fun!
