## **Chefs in the Laboratory**

Have you ever wondered how things work? Discover, explore, and learn about our wonderful world through tasty science experiments! Eat slime! Construct the layers of the Earth and claim you have eaten the world! Come join us and explore the possibilities! **\*If your child has food allergies we will make every effort to accommodate his/her needs, but please be aware that all ingredients are not guaranteed to be free of all various allergens.**

## **Coding and Technology for Kids**

Have you ever wondered how to code a video game, create animations or your own story on the computer? Want to have fun on the computer and get creative? We will explore computer science through coding, educational websites, videos and unplugged lessons.

## **Makerspace- Explore, Design, Build, Create!**

Calling all kids! We need your creative minds to explore, invent and problem solve through hands-on learning tasks. You will work both individually and collaboratively on STEAM- based activities. Get ready to create things like luge tracks, obstacles for marbles, circuits, and simple pneumatic machines.

## **Primary STEAM**

This course is designed to enhance children's thinking skills by having them participate in exciting and stimulating science, technology, engineering, art and mathematics activities. Children will build projects, spend time in observation stations and use art materials to record experiences.

## **Winter Wonderland Crafts**

Do you have an interest in the winter and enjoy the snow? Join this hands-on & "COOL" session to create your own puffy paint snowman, snowflakes, personalized snow globes, and design a mug ALL while indoors! We'll even make colorful snowflakes to brighten up the wintertime and enjoy a cup of hot chocolate!
