

SCOPE Education Services and
Western Suffolk BOCES Presents
Virtual STEAM Enrichment 2021
For Students in Grades 3-5

All programs below are from 4pm – 5pm.

\$90 per course

*When registering for a course, you are signing-up for 4 sessions
of the same course.*

Gardening at Home Tuesdays-March 2, 9, 16, 23

As the seasons change from winter to spring, warmer weather and sunny days mean it's time to start planting! In four, one-hour after-school sessions, students will learn basic vegetable garden care and maintenance. We will practice sustainable gardening methods while investigating plants, plant parts, soil and pollinators.

Exciting Earth Day Activities: Wednesdays-March 3, 10, 17, 24

Mindfulness of Earth's resources is important for conserving and protecting our planet. In this engaging four session program, participants will create sustainable crafts and participate in Earth conscious activities. These activities may include making journals out of recycled materials, seeding projects to grow native plants, and reusing materials to create new, useful things.

Projectile Madness: Thursdays-March 4, 11, 18, 25

During these introductory physical science programs, students will learn the science behind propelling different objects. Each week, using simple and inexpensive supplies, students will learn how to make a different mechanism for propelling an object through the air.

There is no material requirement for these sessions, but students will be provided with directions on how to perform the activity at home after the session is complete.

Registration Begins Monday, 2/15/21
