 Enrichment Coordinator: Dan Seid—dseid@scopeonline.us

SCOPE EDUCATION SERVICES

K-1 Course Descriptions:

Disney Music & Art Experience:

Come along on a magic carpet ride as we show you a whole new world of music and art from Walt Disney. You will learn famous songs, music and movement of Disney productions featuring Frozen, Aladdin, Lion King, Beauty and the Beast and more. You will whistle while you work and sing along as we also complete cartooning and art projects related to Disney characters and scenes. Children will be immersed in a world of art, music and cartooning.

Edible Science:

Have you ever wondered how things work? Discover, explore, and create our wonderful world through Edible Science! Ever eat slime? Ever create a worm farm out of pudding and gummy worms? Construct the layers of the Earth and claim you have eaten the world! Come join us and learn about Science and then eat what you learned!

Fun with Nature

Do you love to collect flowers, rocks, sticks, and leaves but you're not sure what to do with them? Let's explore the nature around us and create art and crafts with your findings. Be prepared to get a little messy during this fun and hands-on class. Students will create bird feeders, sun catchers, plant seeds, go on scavenger hunts, and MORE! Join this adventure and get creative!

Introduction to Spanish!

In this introductory course, children will learn beginners Spanish. Students will learn their names, colors, numbers and basic conversation vocabulary words to begin to understand the Spanish language. Students will work on hand son projects while learning Spanish vocabulary! This will be a fun and educational summer course!

Lego Engineering & Coding

Students will be using LEGOs to complete challenges and build stories! They will have time to use their imagination to do some free building as well. Students will learn block based coding strategies to program and code robots as well!

Primary Coding and Technology

This introductory course will feature an outstanding curriculum focusing on problem based solving, logical thinking, creativity, resilience, persistence and boost your child's confidence! Students will code with Mine-craft, Star Wars, and Frozen block-based tutorial programs.

Summer Arts & Crafts:

If you enjoy arts and crafts and love summer, then this is the course for you! Using summer fun themes like beaches, shells, fish, boats and lighthouses we will create a variety of sun-sational projects. In this course, we will use a variety of mediums to create beautiful works of art! We will use materials such as watercolors, clay, paint and more. Let your imagination soar as you explore summer favorites.

SCOPE EDUCATION SERVICES

Grades 2-3 Course Descriptions:

Lego, Robotics, and Coding

This introductory course will feature an outstanding curriculum focusing on problem based solving, logical thinking, creativity, resilience, persistence and boost your child's confidence! Students will code with Minecraft, Star Wars, and Frozen block-based tutorial programs

Edible Science:

Have you ever wondered how things work? Discover, explore, and create our wonderful world through Edible Science! Ever eat slime? Ever create a worm farm out of pudding and gummy worms? Construct the layers of the Earth and claim you have eaten the world! Come join us and learn about Science and then eat what you learned!

Jewelry & Fashion Design:

In this jewelry making class, students learn with friends the art of jewelry and bracelet design. Kids can use lanyard, rainbow loom, and string bracelets to be creative and design fashionable jewelry to take home and share with friends and families. Children will also learn skills and artistic techniques to design and sketch clothing.

Lego Engineering, Robotics and Coding

Students will be using LEGOs to complete challenges and build stories! They will have time to use their imagination to do some free building as well. Students will learn block based coding strategies to program and code robots as well!

Introduction to Spanish!

In this introductory course, children will learn beginners Spanish. Students will learn their names, colors, numbers and basic conversation vocabulary words to begin to understand the Spanish language. Students will work on hand son projects while learning Spanish vocabulary! This will be a fun and educational summer course!

Sculpting & Clay Creations:

Join an amazing art instructor, as she teaches students different techniques and styles with clay sculpting. Students will have the opportunity to create projects while learning many different artistic styles. Students will create their own masterpieces from a skilled and certified art-instructor with a focus on mindfulness and artistic expression.

Summer Arts & Crafts:

If you enjoy arts and crafts and love summer, then this is the course for you! Using summer fun themes like beaches, shells, fish, boats and lighthouses we will create a variety of sun-sational projects. In this course, we will use a variety of mediums to create beautiful works of art! We will use materials such as watercolors, clay, paint and more. Let your imagination soar as you explore summer favorites.

Grades 4-6 Course Descriptions:

Comic Book & Graphic Novel Design:

Do you love comic books and graphic novels? Are you looking to become a better writer and designer? This course will teach you two skills, writing and sketching. You will become a better writer, story teller, and also learn sketching and drawing techniques. By the end of this course you will have your own finalized and published graphic novel ready to go and share with friends and family. If you love art, design, and want to become a great writer- this course is for you!

Extreme STEAM & Makerspace:

Do you love to create new designs or to solve challenging problems? Work with teams and let your curiosity and creativity soar, as we explore the world of SCIENCE, TECHNOLOGY, ENGINEERING, ART and MATH!

Introduction to Spanish!

In this introductory course, children will learn beginners Spanish. Students will learn their names, colors, numbers and basic conversation vocabulary words to begin to understand the Spanish language. Students will work on hand son projects while learning Spanish vocabulary! This will be a fun and educational summer course!

Paint Night in the AM:

Students will learn through step by step tutorial based instruction on how to create and paint their own canvas creations. Students will bring home their artistic creations and enhance their expressive art skills.

MAD Scientists

In this summer science class students will learn scientific principles while completing many hands on science labs and experiments every day! You will make your own slime, volcanoes, catapults, and many more hands on science projects to keep you having fun and learning every day!

Rocketry and Retro-Science

Science is exploratory and exciting! It's about the "Aha!" moments in life, like when you figure out how something works or when you're amazed by the result of an awesome experiment. You will have the opportunity to learn about science through our interactive hands-on science activities that will be sure to spark your imagination! Students will learn about Newton's laws of motion and build their own rocket!

Summer Arts & Crafts/Upcycling Art:

If you enjoy arts and crafts and love summer, then this is the course for you! Using summer fun themes like beaches, shells, fish, boats and lighthouses we will create a variety of projects. In this course, we will use a variety of mediums to create beautiful works of art! We will use materials such as watercolors, pastels, paint and more. Let your imagination soar as you explore summer favorites. You will also repurpose materials to create beautiful projects throughout the summer.
