NEW HYDE PARK GARDEN CITY PARK AFTERSCHOOL EXPLORATION

Creative Builders: LEGO® Edition (Grades K-2)

Creative Builders: LEGO® Edition is a hands-on enrichment class where young learners turn big ideas into amazing builds! Each week, students take on a fun LEGO® challenge that sparks imagination while building early engineering and problem-solving skills. Children will design, build, test, and improve their creations as they learn to work together and think like real builders. Every class wraps up with a joyful "Builder's Showcase," where students proudly share what they've created in a supportive, confidence-boosting environment.

CodeLab NextGen: AI, Games & JavaScript (Grades 3-6)

CodeLab NextGen is a cutting-edge afterschool coding course designed for students ready to move beyond the basics and into the future of technology. Over six exciting weeks, students will explore block-based coding, transition into typed JavaScript, and dive into age-appropriate AI coding experiences that power games, animations, and digital creations. Students will design interactive games, experiment with simple AI logic, and learn how real programmers think as they problem-solve, debug, and build projects from concept to completion. This fast-paced, hands-on course blends creativity with computer science, giving students exposure to the tools and ideas shaping today's tech world. Perfect for curious beginners and growing coders alike, CodeLab NextGen empowers students to create, not just consume, technology—while building confidence, collaboration skills, and a strong foundation for future STEM learning.

**WEDNESDAYS 3:00-4:30PM
COURSE OFFERINGS AT EACH SCHOOL!**

\$149.99

MARCH 18, 25, APRIL 15, 22, 29 AND MAY 6 2026
